

THE BASE FORM

Task #16

1. Make a list of five one-word commands, for example, Stop!

The words you have just listed are verbs in one particular form: THE BASE FORM. All verbs have a base form.

2. List the same five words with the word to before them.

To + base form = INFINITIVE. All verbs have an infinitive.

3. List the same five words with the x-word will. This gives a verb some "time" or "tense."
4. Only twelve of the x-words can be used right before a base form. List those twelve.
